

## Custom Laser Engraving...

- Medical Instruments
- Industrial Components
- Electronic Components
- Printed Circuit Boards
- Bar-Coding, & Serializations
- Metals, Plastics & Ceramics
- Plaques & Awards
- Promotional Items
- Logo's
- Trophies
- Name Plates
- Picture Frames
- Sporting Goods
- Personal Projects

### **Express Laser Solutions**

Assures Accelerated Processes  
Without Jeopardizing Quality.

## OTHER UTE CAPABILITIES:

UTE's specialization is Customized Low-Volume, Quick-Turn Quality Services

### **Contract Manufacturing.**

Specialty customized low-volume:

- Electronic and Mechanical Assemblies
- Printed Circuit Board Assemblies
- Cable and Wire Harness Assemblies
- Inventory Management / Kitting

The UTE engineering team is dedicated to delivering technical concepts from paper to reality.

### **Engineering Services.**

- Electronic / Mechanical Design
- Software Design
- PCB Schematic & Design Layout

Experienced professionals are ready to provide a broad spectrum of technical skills for all of your projects.

### **Maintenance & Repair Services.**

- Electronic Equipment
- Printed Circuit Boards
- Fully Warranted

4701 Taylor Road  
Punta Gorda, FL 33950-4720

## A Winning Solution

## OUR EXPANDED SERVICES:

We owe our existence to our customers and we treat every request with the greatest of care. For that reason, we have expanded our Electronic, Manufacturing, Service and Engineering capabilities by offering technologically advanced laser engraving that directly responds to our growing customer needs. We offer Identification engraving on many substrates including: metals, plastics and ceramics.

## WHAT WE OFFER:

Since 1991 our professional engineering department continues to develop and manufacture electronic and mechanical projects for our customers, from partial assemblies to completed products. Our goal is to earn your long-term business and become a beneficial supplier to your company on a long-term basis.

***Assures Accelerated Processes Without Jeopardizing Quality***

### ***ELS Product Etching and Marking***

ELS Laser engraving permanently applies computer-generated images that includes serialization, labeling, bar coding, graphics / logos and much more.

Our laser engraver and its computer-based controls provide ELS operators with a unique combination of accuracy, speed and versatility that cannot be matched by other engraving techniques. Our system provides superior quality and unsurpassed flexibility.

### ***ELS Production Promise***

Our personable ELS staff adheres to a strict production system that assures a professional and permanent product every time. When your product calls for permanent product marking... ELS has the solution.

#### ***Start up.***

We will create your project based on your needs or you can let our creative team show you what we can do with a pre-existing graphic or logo. The choice is yours.

#### ***Production.***

Every job starts with the verification of our customer's requirements. We achieve maximum quality control through sequential inspections. First, we inspect all received parts for imperfections. Next, operators must refer to documentation before proceeding to assure all instructions and requirements are in place. After the first unit is completed our inspectors thoroughly review all documentation to confirm that the job is in total compliance with our customer's stipulations and product specifications.

#### ***Finished Goods.***

Once completed, all engraved parts are inspected again before crating/packaging begins. From the very beginning to the completion of your project, ELS will work to achieve your best expectations... you can rely on **ELS**
